Dream is a wall light conceived for reading light applications in bed-head areas. Dream is easily adjustable by hand, flexible and versatile. Whatever position you adjust it to, it will easily adapt to its position and may maintain it steadily. Its silicone release coating and the smooth lines of its geometry make this luminaire a visually highly attractive piece with a pleasant touch. Dream offers an exceptional lighting quality for reading while having an extraordinary low power consumption. The focal angle of the clearly defined light beam allows to concentrate the light in the desired area and prevents light contamination when two persons share the bed.
